News 2022

GEFU – Discover Culinary Artistry.

Das GEFU-Familienteam: Rudolf, Marlene, René und Daniel Schillheim

The world is **CHANGING...**

The topic of sustainability is playing an increasingly important role globally, including at GEFU. Our sustainability measures will not change the world, but will make our very personal contribution towards a changing world and the future of our children. This includes, for example, our new, particularly durable Storeganizer products which make the storage and organising of foods easier while at the same time helping to avoid plastic waste.

Sustainable also means that you can also rely on GEFU as your reliable partner and a strong brand in the future. A brand with clear themes, high expertise in its field and exceptional products. A brand which offers everything that your customers want from a single source, covering everything from arranging to preparing of foods.

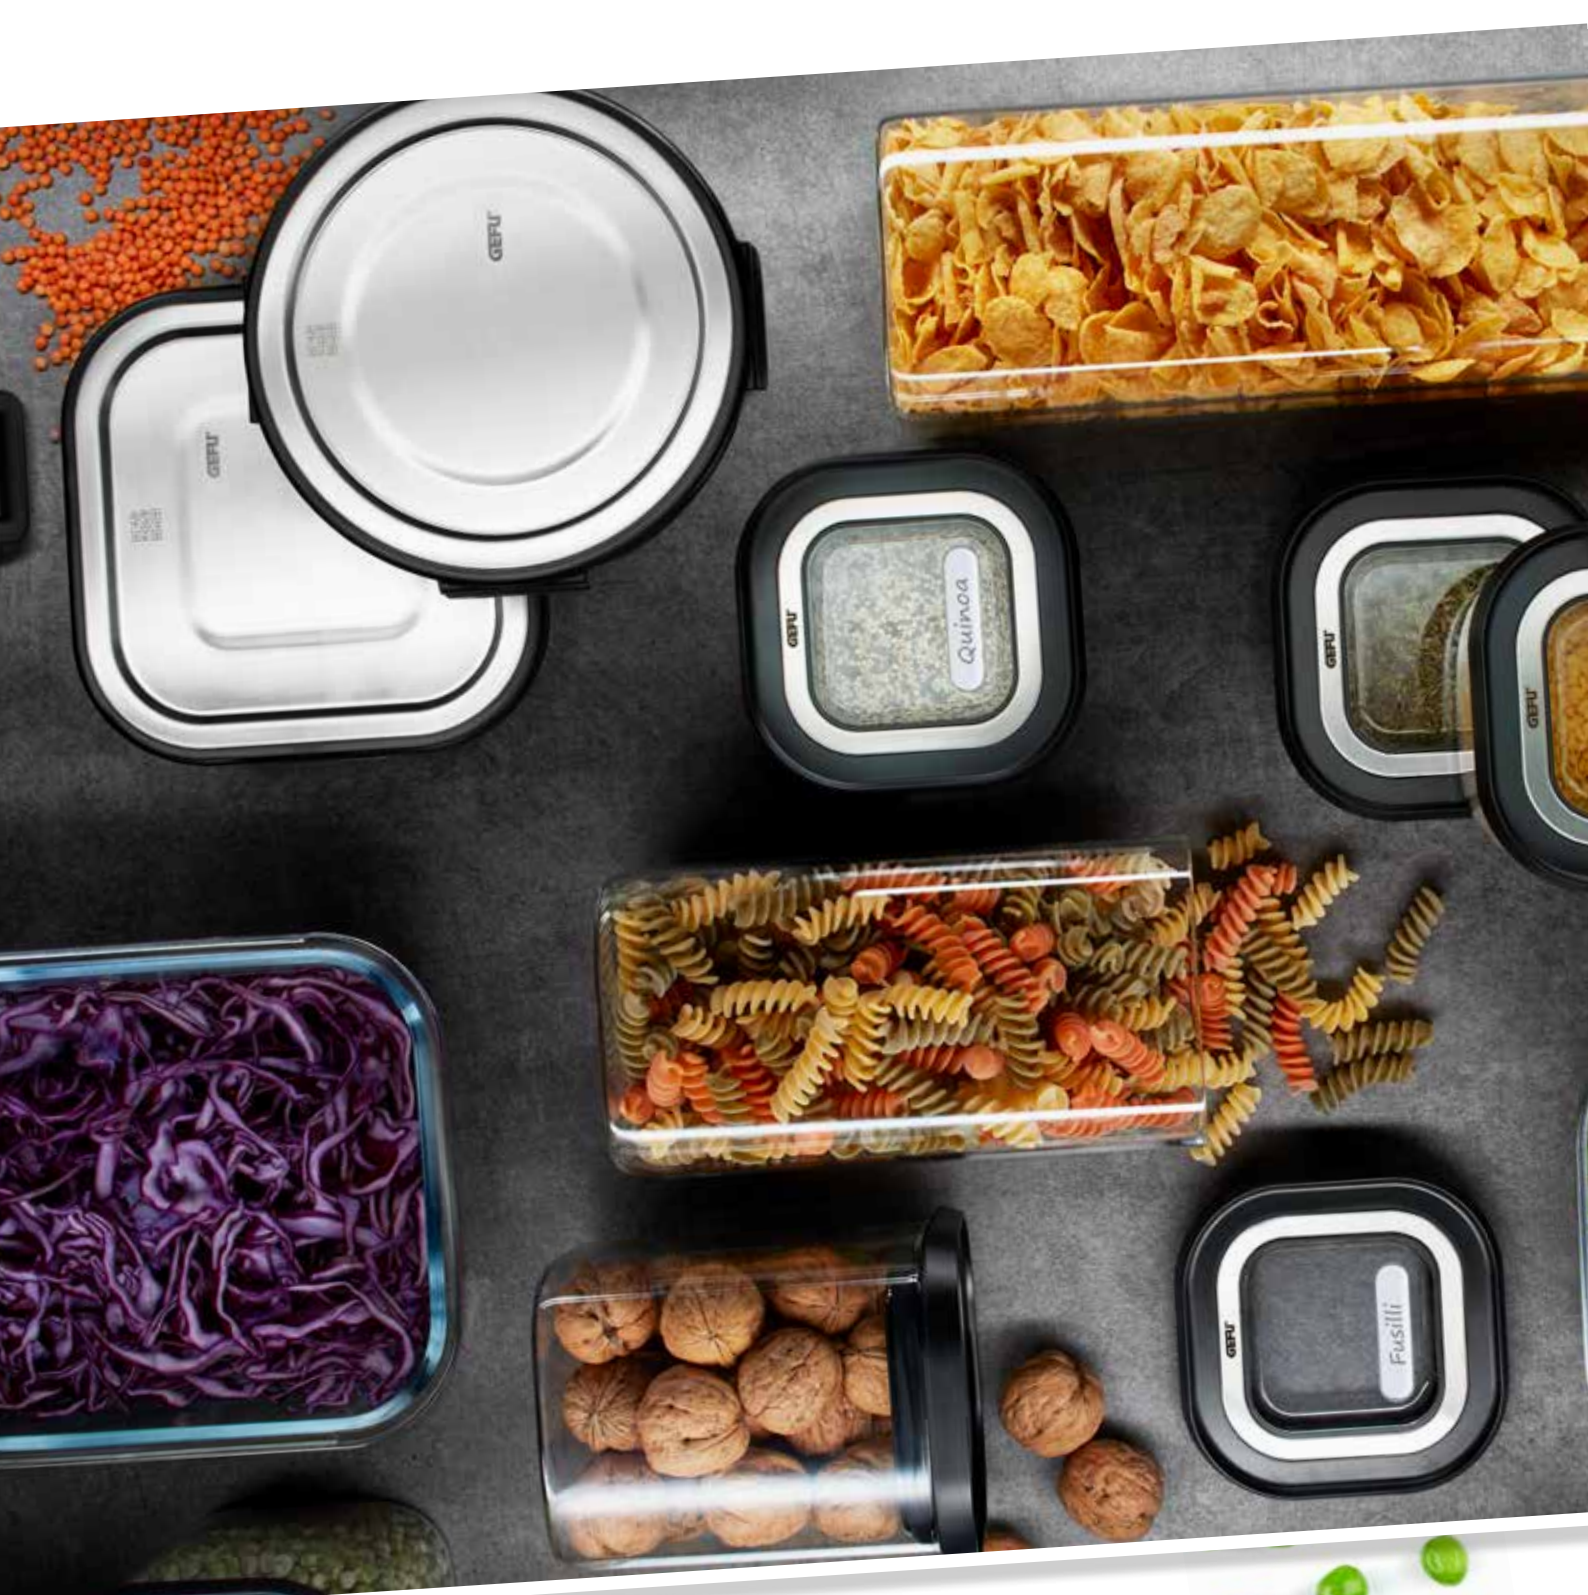

... we're
on it!

This is why every day we work enthusiastically on the development of exciting product ideas and sales-boosting complete solutions which provide increased sales and which sustainably strengthen in particular specialist retailers, the soul of our business.

Look forward to brilliant products, new indulgence themes and fresh ideas „Made in the Sauerland region of Germany“.

Storeganizer

Product film

The joy of cooking and baking starts with a well-organised kitchen. To help with this, GEFU offers an innovative complete system of high-quality reusable containers for secure and space-saving storage of foods in kitchen drawers, the pantry, freezer and fridge – the GEFU Storeganizer.

Not only are they characterised by their timeless design and high functionality, they are also sturdy and durable. They contribute towards the reduction in plastic waste and conservation of valuable raw material and energy resources because, the longer a product can be used, the better it is for the environment. Foods also stay fresh for longer, meaning that less food is thrown away.

Provido

The innovative one with the special valve

The innovative Food Storage Container PROVIDO really puts the competition to shame, as it keeps food crisp and fresh in the fridge and can be taken straight out of the freezer and placed into the microwave for reheating. The special valve in the lid allows the vapour pressure that arises during heating to safely escape. Great idea or what? PROVIDO is also equipped with a QR code for optimum stock control and, like all GEFU Storeganizers, provides noticeably more order and an overview of the contents of the fridge and freezer.

The beautiful one with the click

Fridge open, light on: MILO is the top model among food storage containers. The practical beauty is immediately recognised by its high-quality body made of sustainable borosilicate glass and its robust, clickable stainless steel lid with the practical QR code. MILO keeps foods fresher for that extra bit longer, it is extremely temperature resistant, from the ice-cold freezer to the hot oven. Thanks to its QR code and stock app, it also makes keeping control of stock particularly easy, quick and convenient.

Glass ✨

The elegant organising talent

This is how elegant a contemporary stock control can look using a system: The transparent food storage container PANTRY in a classy designer look is a real eye-catcher for every modern kitchen. The stackable organising talent is perfect for the space-saving storage of dry foods such as pasta, rice, flour and much more. PANTRY is available in five practical sizes which can be combined together as required, while always looking particularly great.

Pantry

Glass ✨

The versatile one made of stainless steel

One for all, all in one: The Food Storage Bowl MUOVO is the multifunctional GEFU Storeganizer for preparing, serving and storing fresh foods. The clear aroma-preserving lid keeps tasty salads wonderfully crisp and, with just one handle, it becomes a practical splash protection when whipping cream. MUOVO is also particularly stable when kneading and mixing batter or dough and simply looks great as an elegant serving bowl on any table.

Food Storage Container MILO

Extra-fresh and beautiful, the high-grade MILO food storage containers with click-on stainless steel lids simply look great and, thanks to their aromatic seal, all food stays fresh for a particularly long time. The containers have been made of borosilicate glass which has no effect on taste and which puts up with even the most extreme temperatures while being particularly light and stable. An integrated partition enables different foods to be stored separately from one another.

- high-grade borosilicate glass container with stainless steel lid
- leak-proof thanks to the silicone seal and click closure
- airtight and aroma-proof
- lasered QR code for stock checks via App (only for Android)
- containers withstand heat up to 300 degrees and cold down to -20 degrees
- do not heat the lid
- suitable for oven and microwave
- borosilicate glass / high-grade stainless steel / plastic
